Project Title:Traffic Management

### Phase-1

#### Problem statement TRAFFIC MANAGEMENT

**Traffic management** is a key branch within [logistics](#). It concerns the planning, control and purchasing of transport services needed to physically move vehicles (for example [aircraft](#), [road vehicles](#), [rolling stock](#) and [watercraft](#)) and [freight](#).

#### **Advantages of Traffic Management System**

- 1.Ensuring immediate clearance for emergency vehicles.
2. Facilitating safer and shorter commute times. Reducing congestion & energy consumption at intersections.
- 3.Offering significant productivity benefits with real-time monitoring of crucial infrastructures.
